

# RTC Suite Designed for

The e-Invoicing in the UAE:  
Key Requirements and  
How To Stay Compliant

# Clearance

# Agenda

## e-Invoicing in UAE

- 01 Welcome & Session Kick-off**
- 02 UAE e-Invoicing: Regulatory Landscape**
- 03 Technical Framework of UAE e-Invoicing**
- 04 FintEdu & RTC Company Introduction**
- 05 Back to UAE e-Invoicing: Practical Business Considerations**
- 06 Q&A and Interactive Discussion**
- Closing Remarks & Certificate Information**

# Speakers

## **Jay Riche**

Co-founder & CEO,  
Dariba Technologies LLC

## **Fabio Santoro**

Partnerships & Alliances Director,  
RTC

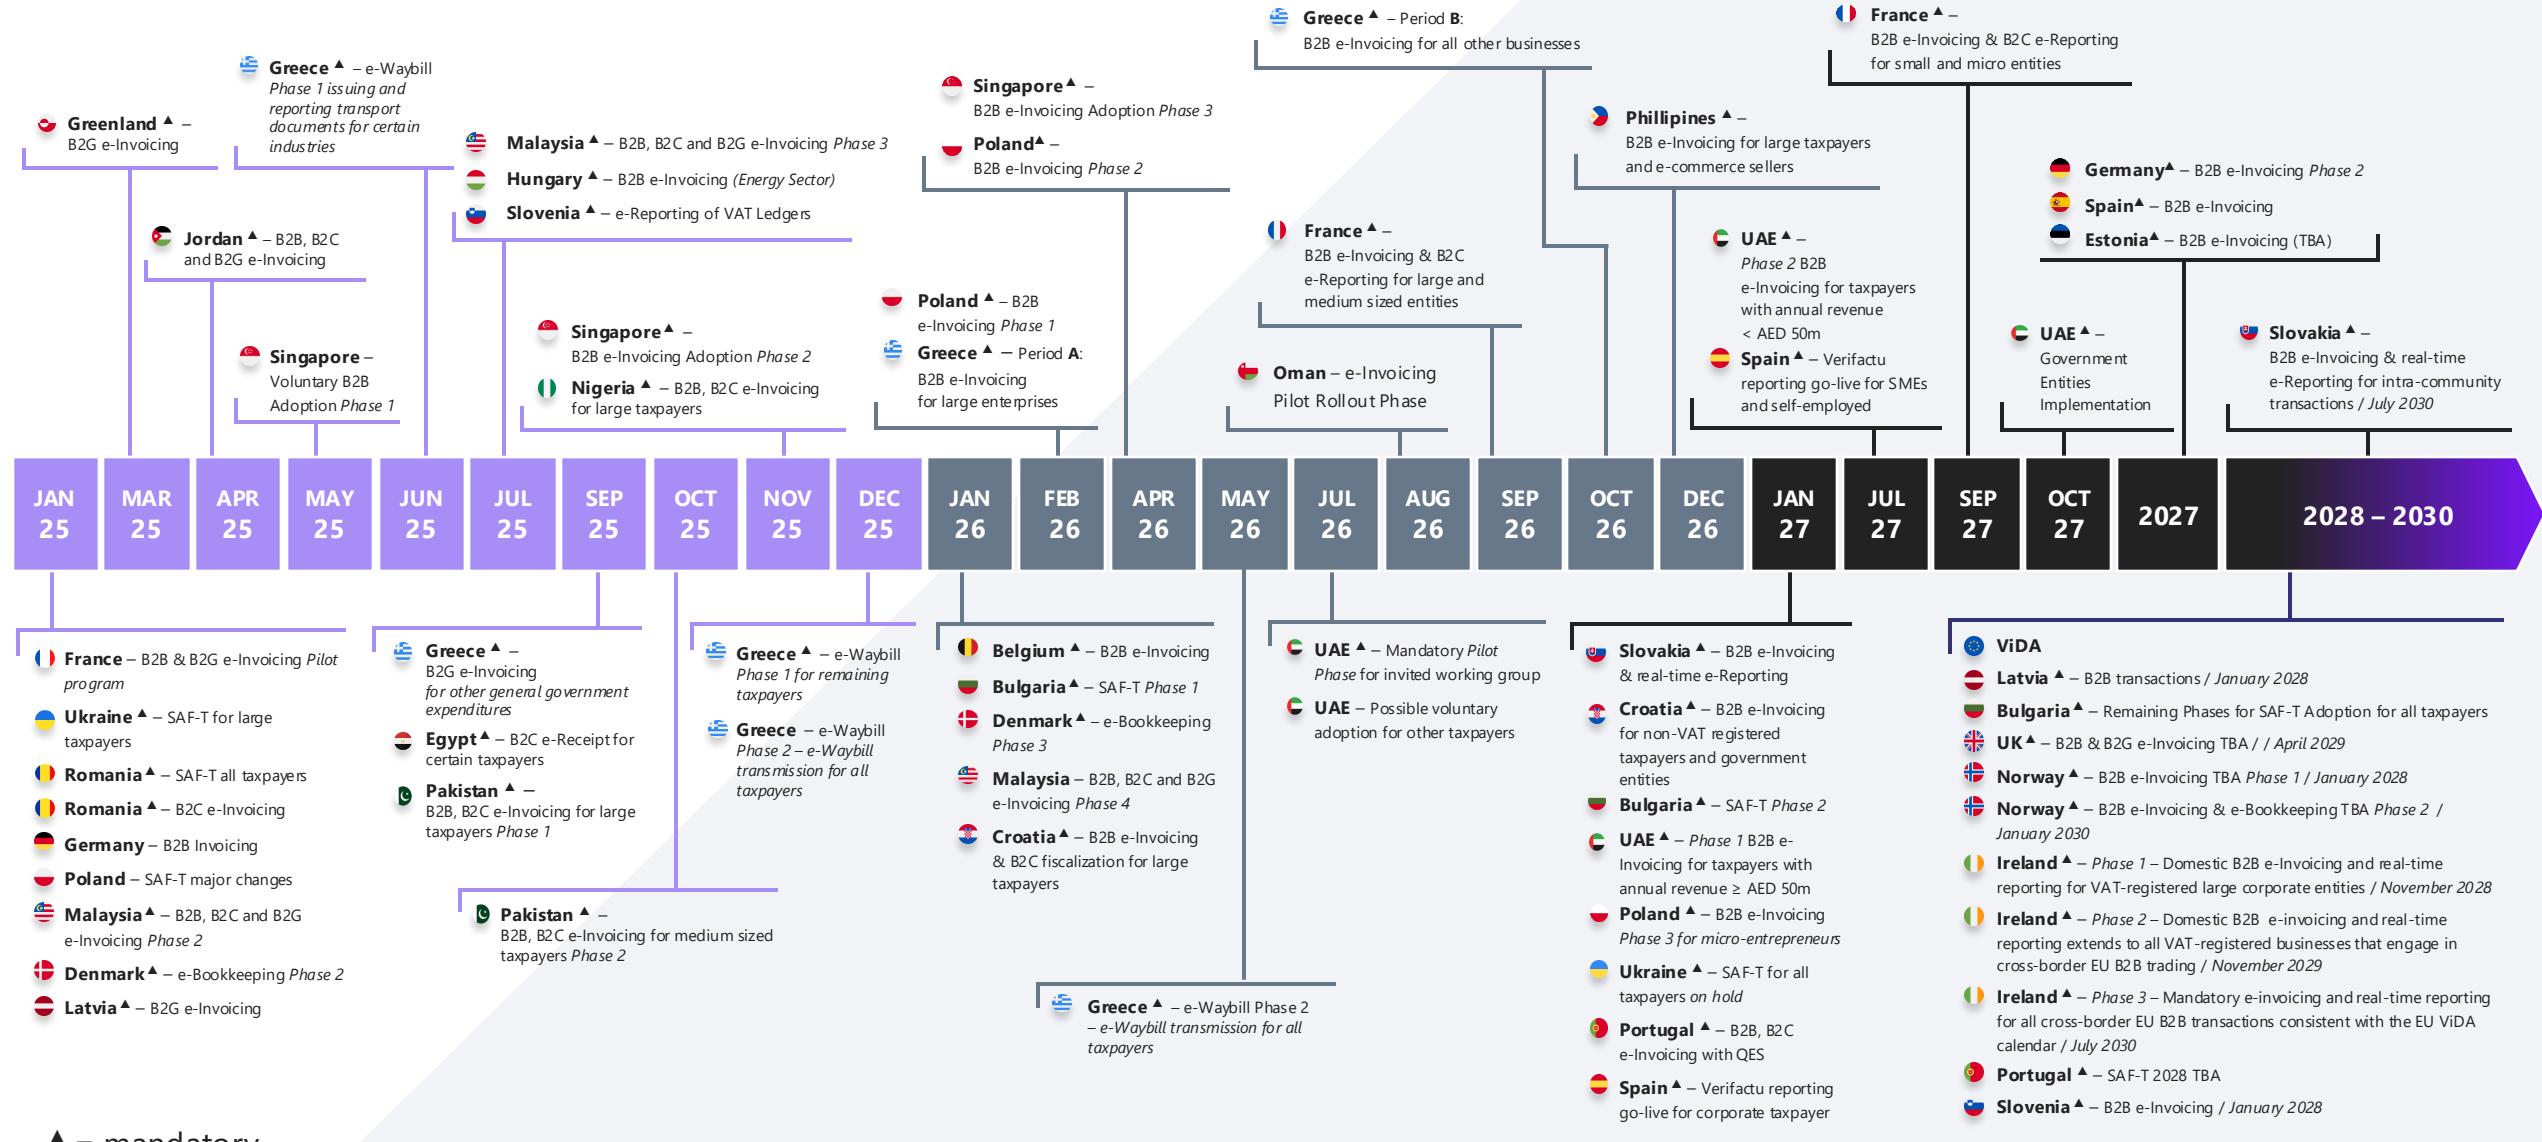

## **Hande Yağcı**

Regulatory Counsel,  
RTC

# How does the UAE fit into a broader tax compliance revolution

# Big Picture

## Global Overview of e-Invoicing & e-Reporting Regulations

# Global E-Invoicing Landscape

## GLOBAL BENCHMARKS

**LATAM: The Pioneers** MATURE

Brazil, Mexico, Chile

Clearance Model standard. Invoices validated by tax authority before issuance to buyer.

**EU: ViDA Initiative** EVOLVING

France, Poland, Germany

Moving to Digital Reporting Requirements (DRR) and harmonization. Peppol standard adoption.

**Asia & Africa** ACCELERATING

Rapid adoption of CTC (Continuous Transaction Controls) to close VAT gaps.

## GCC REGIONAL STATUS

**Saudi Arabia (KSA)** LIVE & MANDATORY

FATOORAH Phase 2: Active integration waves. Centralized clearance model.

**United Arab Emirates** IMPLEMENTATION PHASE

5-Corner Model: Decentralized validation  
Peppol (PINT AE): Int'l standard  
Mandate: Phased July 2026 - 2027

**Oman, Bahrain, Qatar** PLANNING / EARLY

Announcements expected 2025-2026. Likely to follow KSA or UAE models.

## STRATEGIC INSIGHT

### Why this matters for Businesses?

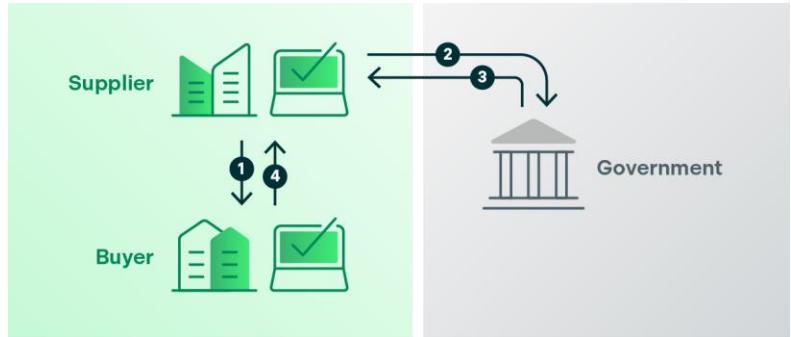

Unlike KSA's centralized model, the UAE's 5-corner model requires Accredited Service Providers (ASPs). This creates a direct commercial role for technology intermediaries like Du.

*"The global shift is from 'Post-Audit' to 'Clearance' models. The UAE is leapfrogging legacy systems to adopt the most advanced hybrid framework."*

# Different Operational Models

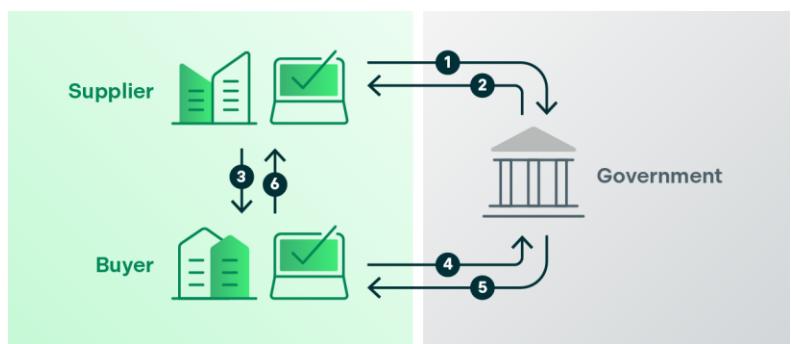

## Real-time reporting

**Reporting** of transactional data to CTC platform in near-time **to exchange**

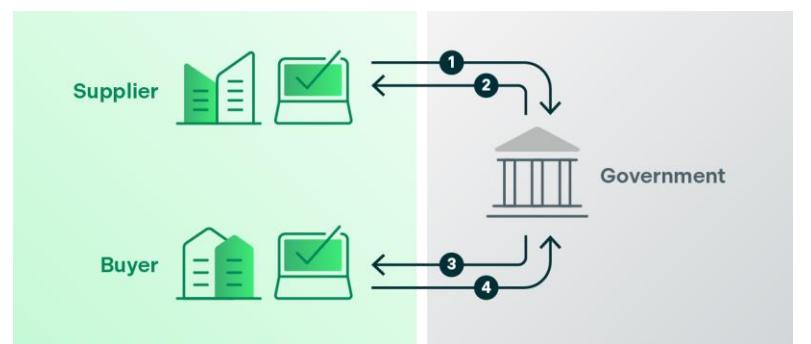

## Centralized exchange

**Reporting** of transactional data to CTC platform in near-time **to exchange**

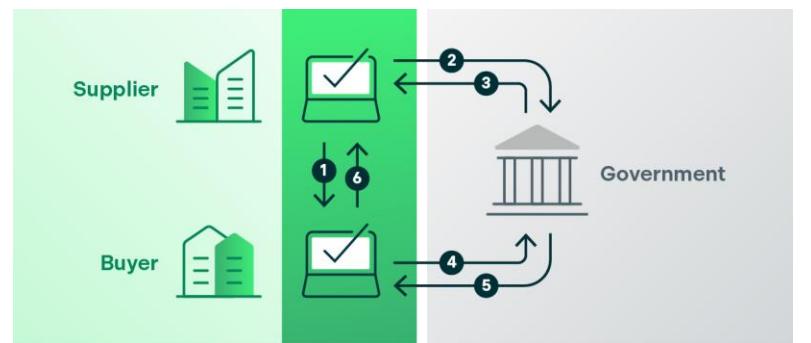

## Clearance

**Validation** by CTC platform in near-real time **to exchange** and validation post reception

## Decentralized CTC & exchange

**Decentralized exchange with validations and reporting** via network of certified vendors

# A short message from FintEdu

# RTC & Dariba Company Profiles

# Dariba Tech | About Us

How Dariba Tech unifies global partnerships and proprietary tax solutions to deliver tailor made solutions for the GCC

## TAX TECHNOLOGY ADVISORY

Helping organizations navigate the GCC's new era of digital tax compliance

## ELECTRONIC INVOICING

Sovereign-based, end-to-end Peppol-ready eInvoicing enablement for the GCC

## TAX COMPLIANCE SOLUTIONS

Automated tax tools to support compliant reporting including VAT and International Tax across the GCC

### Pillar II Data Engine

BEPS 2.0 ingestion, enrichment & mapping

### Tax Analytics

Automated extraction, mismatch alerts & insights

### AI-Enable Tax Analytics

Turning raw tax and ERP data into actionable insights.

### Electronic Invoicing

Enriching and validating invoice data using intelligent automation.

## Our Mission

"At Dariba Tech, our mission is to reimagine tax technology in the Gulf.

Dariba Technologies is a next-generation GCC tax-technology firm delivering e-invoicing platforms, tax automation tools, and compliance technology across the Middle East.

Our clients rely on us for mission critical implementation, seamless integration with ERPs, and ongoing advisory on evolving GCC tax regulations.

We work at the intersection of tax, technology, digital transformation, and regulatory compliance."

CREATING THE GCC'S FIRST INTEGRATED TAX TECHNOLOGY ECOSYSTEM

Bringing together global expertise and AI-powered innovation.

# RTC Introduction

## Company Overview

**We started RTC to fulfill a simple mission:**

to provide a compact and simple solution to help multinationals manage compliance obligations on a single platform.

**Headquartered in Ireland, we have years of experience in:**

-  Regulatory tax compliance
-  Programming and architecture
-  ERP ecosystems
-  Global tax technology transformation projects

### 31 March 2027 – Appoint ASP

- SMEs (Revenue in AED up to 50m) must appoint an ASP by 31st Mar. 2027

### 1 October 2027 – Go-live

- Government entities are mandated to receive, issue, exchange and report e-invoices under the same framework.

### 31 March 2027 – Appoint ASP

- Government entities must appoint an ASP by **31st Mar. 2027**

# UAE e-Invoicing

## Regulatory Requirements – Business Aspect

### Scope of the Law

- **B2B transactions**
- **B2G transactions**
- *B2C transactions are not yet covered under the law. The tax authority may expand this mandate to include B2C transactions at a later stage.*

### Document Types

- **Electronic Invoice**

Invoice issued, transmitted and received in a **structured electronic format** enabling automatic electronic processing.

- **Electronic Credit Note**

Structured credit note used for:

- Cancellations,
- Reductions in consideration,
- Refunds

- **Tax Data Document**

Document sent by the sender and the receiver, to tax authorities to report an invoice.

### Penalty snapshot – Cabinet Decision 106 of 2025

- Failure to implement EIS / appoint ASP on time
  - AED 5,000 for each month of delay or part thereof.
- Issuer doesn't issue & transmit e-invoice/e-credit note via EIS on time
  - AED 100 per e-invoice, capped at AED 5,000 per calendar month.
- Issuer or recipient doesn't notify the Authority of a system failure on time or doesn't notify ASP of changes to data registered with the Authority on time
  - AED 1,000 for each day of delay (or part thereof).

### Entities Obligated to Issue e-Invoices in UAE

- Any **person conducting business in the UAE for every business transaction**, unless the person or transaction is expressly excluded.

Including:

- **UAE VAT Registrant**
- **UAE VAT group member**
- **Not a UAE VAT Registrant but registered for another UAE tax type**

# UAE e-Invoicing

## Regulatory Requirements – Technical Aspect

### File Format

- **Peppol PINT AE 1.0.1**
- Electronic invoices and credit notes must be generated in Peppol PINT AE 1.0.1 Format.

### Archiving

- Required archiving period is;
- **If VAT applicable, at least 5 years, .**
- **If Corporate Tax applies at least 7 years** after the end of the relevant tax period.
- Longer retention (15 years) may apply for certain assets/real estate per law.

### Invoice Process Details

- Businesses in scope of UAE e-invoicing will be required to work with an **Accredited Service Provider (ASP)** to issue, receive and report electronic invoices and credit notes.
- The supplier's ASP sends the e-invoice through the **Peppol network** using the buyer's **electronic address (Peppol Endpoint ID)**, so that the invoice reaches the buyer's ASP and is delivered into the buyer's system.
- The UAE will use a **5-corner model**
- ASPs **validate the invoice** against UAE e-invoicing rules, convert it into the UAE standard format where needed, and then forward it to the buyer and the buyer's ASP.
- At the same time, **both the sender's ASP and the receiver's ASP send the tax-relevant data (TDD) to the FTA**; the invoice does not need to be pre-cleared by the FTA before it is delivered to the buyer.

# Where is all of this coming from?

# Peppol – What is it?

## The Pan-European Public Procurement Online

Peppol is a **standardised network** that lets businesses and governments **exchange electronic documents securely and in a common format**

Similarly to a mobile network, it requires:

- **Suppliers and Buyers**

Participants who send and receive electronic documents.

- **Access Points**

Acts like a service provider, connecting suppliers and buyers to the Peppol network.

- **Peppol IDs**

A unique address for each participant, similar to a phone number.

- **SML (Service Metadata Locator)**

A global directory that points to the correct local registry.

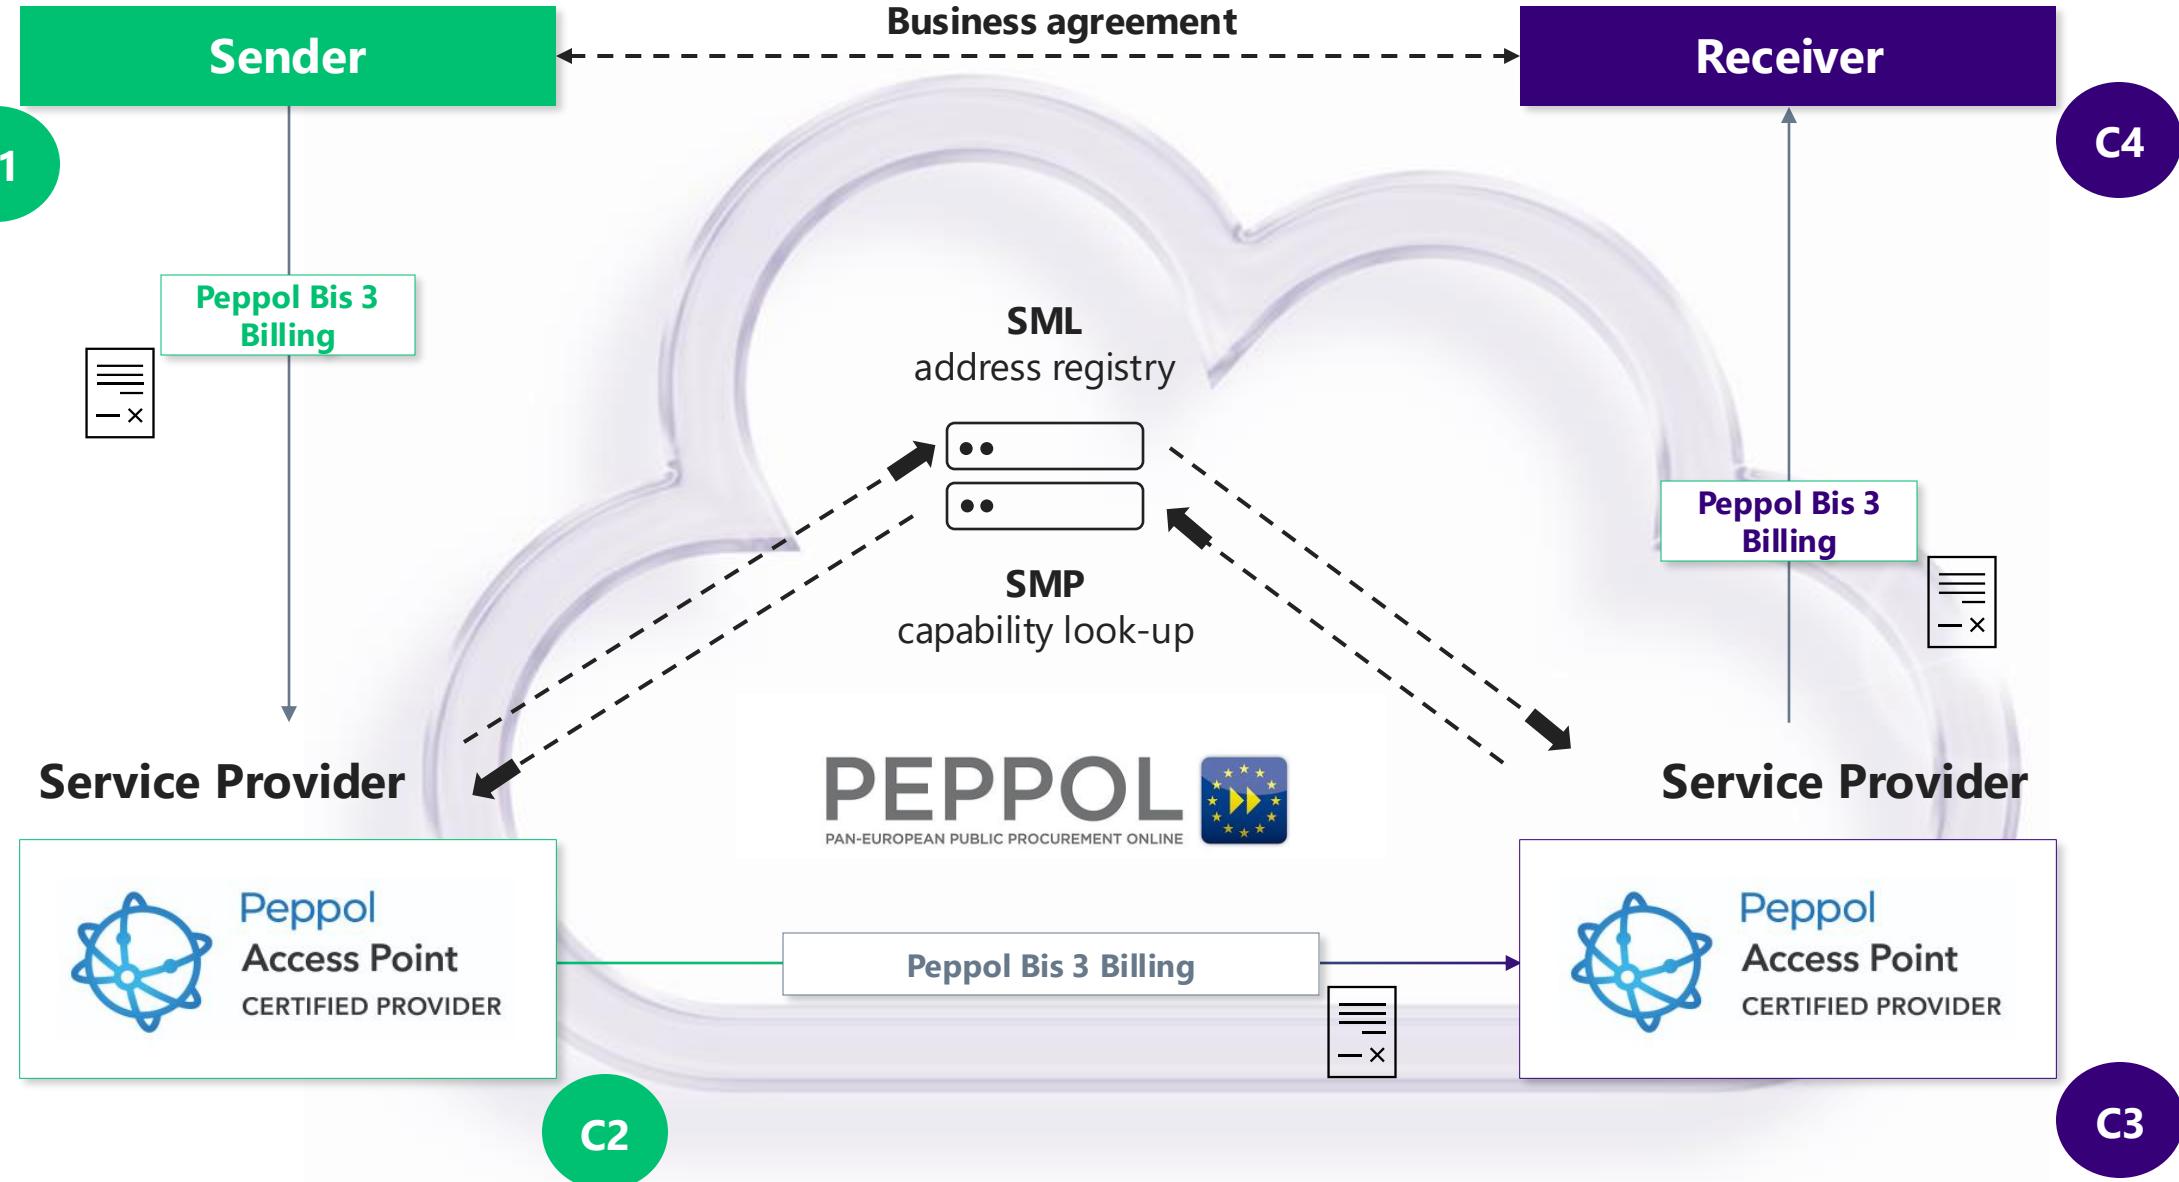

- **SMP (Service Metadata Publisher)**

A local registry containing each participant's delivery address and supported document types.

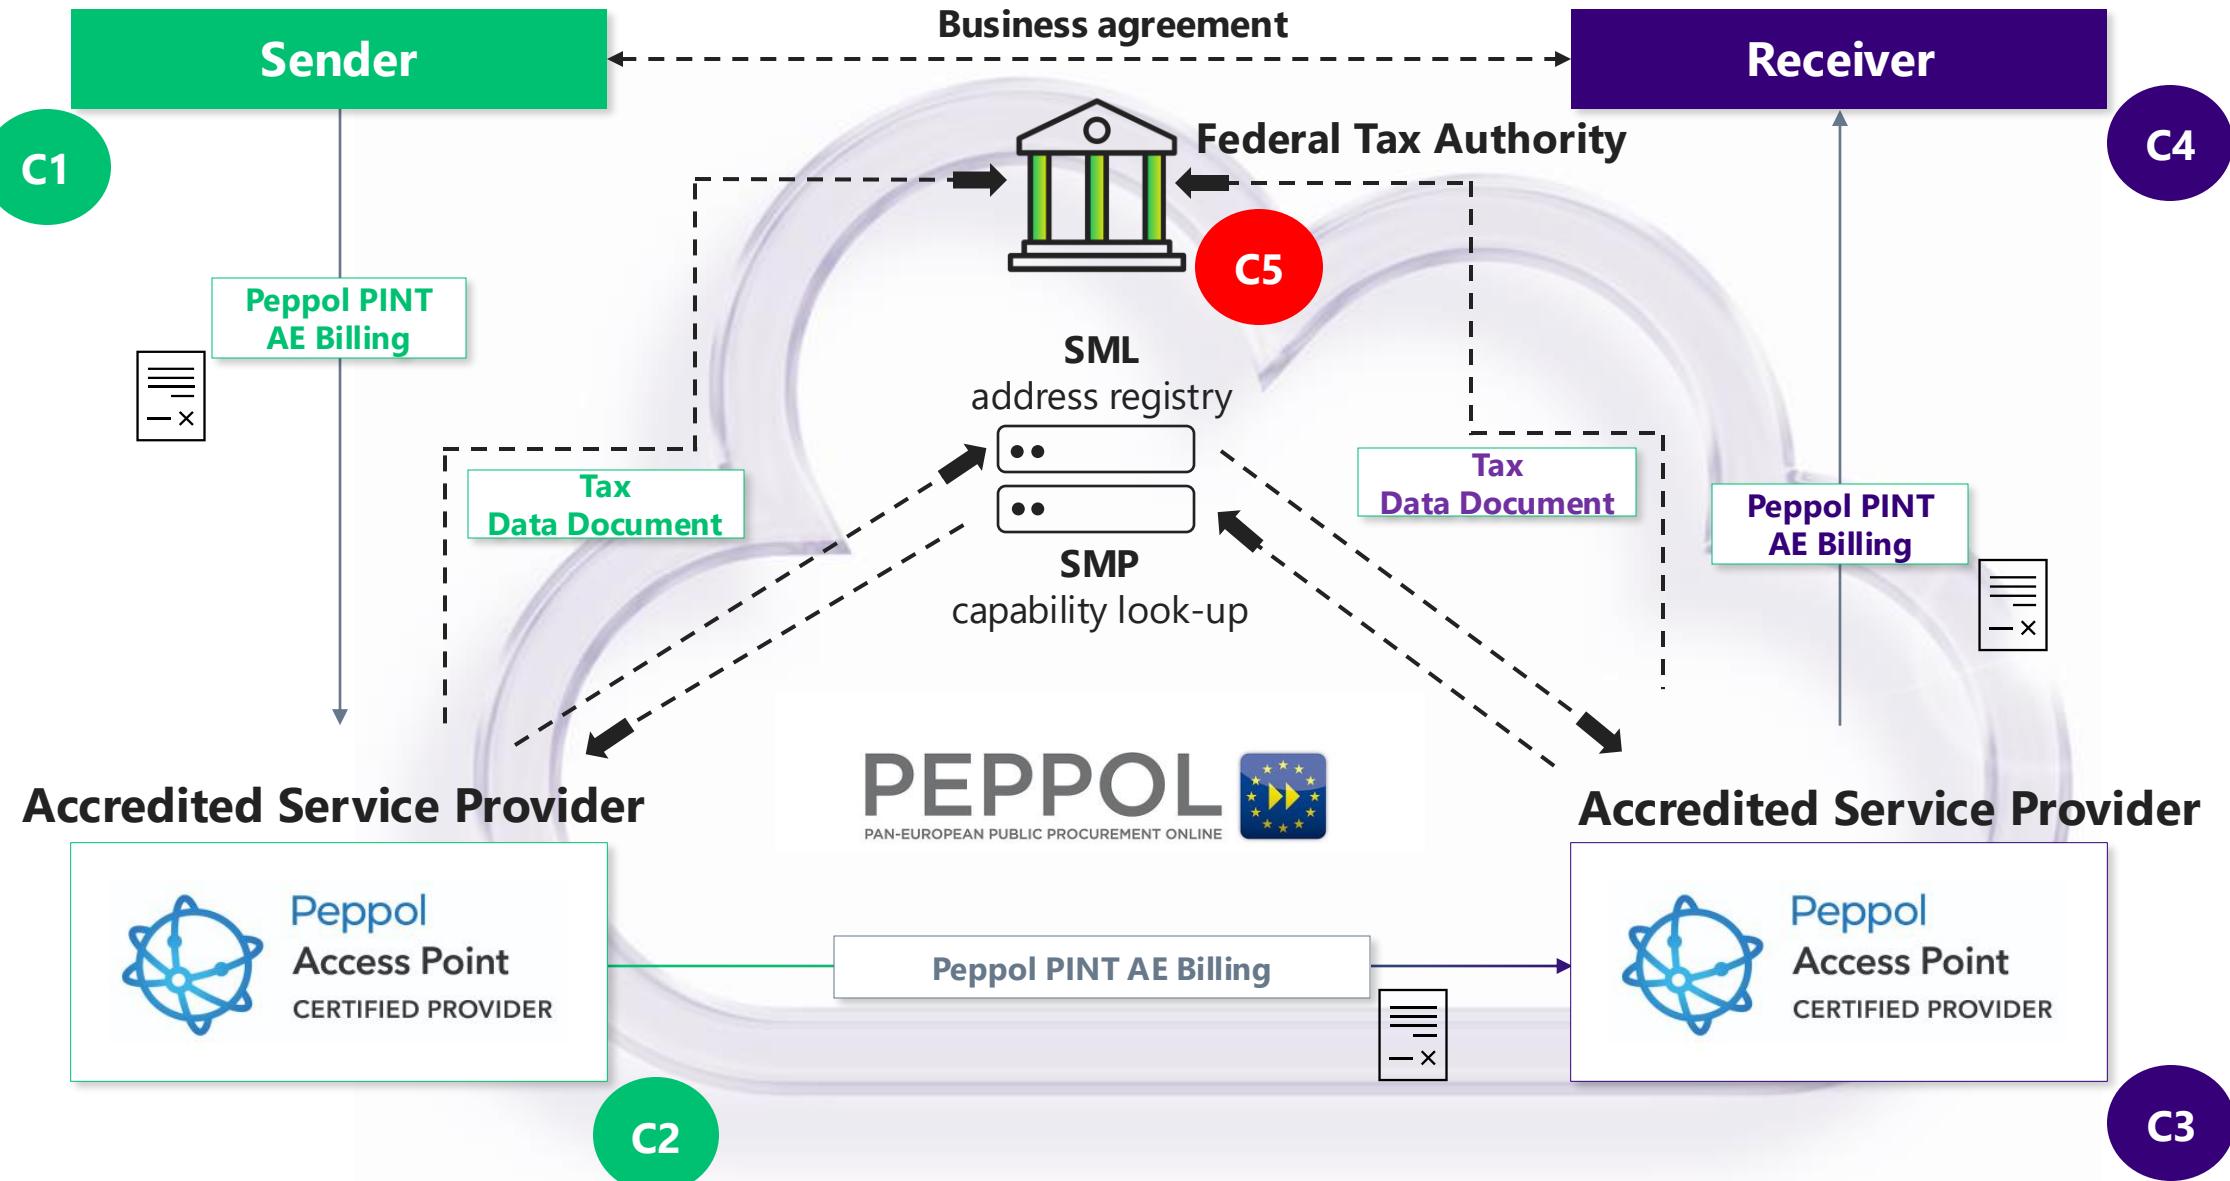

- **BIS Specifications**

Standard formats and rules that ensure all documents follow the same structure.
